RM (Bob) Hinkelman

My careers have spanned decades and a variety of disciplines.

The Early Part Nearly four decades with AT&T and Lucent Technologies. Assignments in Operations, Sales, Engineering, Marketing & Intellectual Property. Awarded by Bell Labs for work in Network Architecture and IP Innovation. In New Services Development, brought out some predecessors of Internet capabilities. Moved 10 times.

Post Early Part Communications consulting with Salem Institute of Florida. Co-developed business plans, marketing plans and strategic planning at The Strategic Business Planning Company. Co-authored "Perpetual Innovation", an Intellectual Property commercialization *tour de force*.

For over 30 years during these times, I was a landscape, seascape and wild life painter. Some awards, numerous shows, few sales. "Good", but not good enough.

The Current Part Primarily writing on Sustainability, energy, politics, controversial issues, why the country is doing what it is doing sprinkled with some human interest like life at the bird feeder.

Married second timer in southeastern Florida and love both. But, the grandchildren and their parents are a long, long ways away.
